

IUVA NASA Space Science Day

Dear High School Administrator,

On behalf of the National Aeronautics and Space Administration (NASA) Space Science Days program, the International Ultraviolet Association (IUVA), and the Society of Hispanic Professional Engineers, I would like to invite teachers and underrepresented students from your high school to attend an educational workshop designed to inspire and broaden their knowledge about space science.

The event will feature lecturers and instructors from NASA. In addition, several science, technology, engineering and mathematics (STEM) professionals and community leaders from the DC metro area have volunteered to inspire high school teachers and underrepresented students to broaden their knowledge about the adventure of space exploration and serve as role models.

This educational outreach event will be held as follows:

Student Workshop, Monday, Feb 11th, 9 a.m. – 2:00 p.m.

Underrepresented high school students are invited to participate in hands on learning about NASA exploration, discoveries, and science.

There is no cost to attend this event. Space is limited; register as soon as possible. The registration deadline is **Friday, Jan 25th, by 5 p.m. ET.**

Each high school must assign a Coordinator to coordinate logistics and transportation to and from the venue and assign at least one Supervisor, who is at least 21 years old, to accompany the group of students attending from their high school.

You can find more information about this event here: <http://slidesha.re/NIEaNE>. High school coordinators can register online here: shpe-dc.org/NSSD

We look forward to seeing you there. Your participation will make this event a great success.

Regards,

Omar Castillo
